

HCIA-AI V4.0 Version Instructions

Version	Date	Instruction
V3.5	2022/12/30	Enabled V3.5 training materials, lab guides, and exam questions.
V4.0	2025/3/28	Enable V4.0 training materials, lab guides, and exam questions. V4.0 will be released on March 28, 2025, and V3.5 will become unavailable from September 30, 2025. The earlier and new versions coexist for 6 months.
V4.0	2025/6/30	Update V4.0 training materials, lab guides, and exam questions.

1. Training Material Change Instructions

The training materials of HCIA-AI V4.0 are as follows:

Key Points	V3.5	V4.0	Change Instructions
1. AI Overview	15%	19%	Optimized the AI overview and AI technologies and application. Added basic concepts and applications of foundation models.
2. Machine Learning Overview	20%	19%	N/A
3. Basics of Deep Learning and Foundation Models	25%	29%	Optimized and reconstructed the deep learning overview, and described the basic concepts of deep learning from the perspective of the evolution of neural networks such as perceptrons and fully-connected neural networks. Added the basics of the Transformer architecture and foundation model infrastructure.
4. AI Development Framework	20%	14%	Added the description of PyTorch basics and commonly used modules. Added the description of model deployment.
5. AI Platform	14%	0%	Deleted the AI platform.
5. AI Business Process Overview	0%	14%	Added AI business processes and large model business process.
6. Cutting-edge AI Applications	6%	5%	Optimized cutting-edge AI application scenarios and added cutting-edge applications such as voice assistant, smart home, intelligent vehicle and intelligent robot.

			Simplified the description of quantum computing and machine learning.
--	--	--	---

2. Lab Guide Change Instructions

The lab guides of HCIA-AI V4.0 are as follows:

Key Points	V3.5	V4.0	Change Instructions
1. Machine Learning Experiment	30%	33%	N/A
2. Experiments on Deep Learning and AI Development Framework	50%	0%	Deleted.
3. Experiments on Deep Learning	0%	12%	Added the complete description of implementing a fully-connected neural network.
4. Experiments on AI Development Framework	0%	44%	Added the PyTorch basics, network construction, and image classification experiments.
5. Model Deployment and Application Experiment	0%	11%	Added the on LLaMA.cpp model deployment and application experiment.
6. AI ModelArts Experiment	20%	0%	Deleted.

3. Test Content Change Instructions

The following table lists the test content of HCIA-AI V4.0. For details about the differences from HCIA-AI V3.5, see training material change instructions and lab guide change instructions.

Key Points	Written Exam
1. AI Overview	10%
2. Machine Learning Overview	20%
3. Basics of Deep Learning and Foundation Models	30%
4. AI Development Framework	20%
5. AI Business Process Overview	15%
6. Cutting-edge AI Applications	5%
